SUMMARY

Backend-focused Laravel Developer building secure, production-grade web applications with PHP, MySQL, and RESTful APIs. Comfortable owning features end-to-end—from database schema and Eloquent modeling to API design and JavaScript/AJAX integration. Experienced with Docker, Redis, Nginx, Azure Blob Storage, and AI microservices. B.E. in Computer Science with a strong foundation in OOP, MVC architecture, and SDLC.

SKILLS

Backend & Frameworks: PHP, Laravel 12, RESTful APIs, MVC Architecture, Eloquent ORM, Laravel Sanctum, Blade Templating, Artisan CLI

Databases & Data Storage: MySQL, PostgreSQL, SQLite, Database Design, Query Optimization

DevOps & Infrastructure: Docker, Nginx, Apache, Redis, Git, Linux, XAMPP

Frontend Integration: HTML5, CSS3, JavaScript, jQuery, AJAX, React.js, Bootstrap, Tailwind CSS, Vite, DataTables

Engineering Practices: Agile, SDLC, Code Review, API Integration, Version Control

WORK EXPERIENCE

Simform Software LLP	Ahmedabad, Gujarat
Trainee Engineer	Jan 2026 - Present
• Developed backend modules and RESTful APIs using PHP, Laravel, and MySQL, enabling secure CRUD operations. • Collaborated in Agile teams, contributing feature branches, code reviews, and bug fixes using Git/GitHub. • Integrated JavaScript/AJAX front ends with Laravel backend, reducing full-page reloads. • Deployed and tested applications in Linux-based environments, maintaining code quality and adherence to MVC architecture and company coding standards.	

PROJECTS

AMRV — AI-Powered Medical Report Vault
• Architected secure RESTful APIs using Laravel 12 and Laravel Sanctum authentication to manage user profiles, medical reports, real-time chat, and notifications. • Built encrypted medical-report storage pipeline using Azure Blob Storage integrated with Flask-based AI microservices for automated report summarization and health-metric extraction. • Deployed containerized architecture with Docker, Nginx, PostgreSQL, and Redis, implementing background job queues to support scalable, high-availability healthcare workflows.
Society Management System
• Built full-stack society management platform with role-based access control (RBAC) for Super Admin, Admin, Resident, and Gatekeeper roles using Laravel and MySQL. • Developed real-time visitor pass management, complaint tracking, and delivery management modules with AJAX and JavaScript, streamlining front-desk operations. • Designed responsive UI with Bootstrap and DataTables and implemented webcam-based visitor photo capture to strengthen access security.
Course Management System
• Built full-stack course management platform with role-based authentication for Admin, Instructor, and Student user types using PHP and MySQL. • Implemented CRUD-based modules for course, enrollment, and assignment tracking with real-time AJAX interactivity. • Designed responsive, cross-device UI using Bootstrap to improve accessibility and user experience.

EDUCATION

Gujarat Technological University	
B.E., Computer Science and Engineering	May 2022 - May 2026
• CGPA: 8.66	
Gujarat Technological University	
Diploma in Computer Engineering	May 2020 - May 2023
• CGPA: 8.34	

CERTIFICATIONS

• PHP Certification: Programming Hub (Google Developer Launchpad) — 30-hour certification covering server-side development, MySQL integration, and dynamic web application development.

ACHIEVEMENTS

• AU Hackathon 2025: Built FinFlow, an AI-powered financial dashboard with blockchain-based identity verification using React, Vite, Tailwind CSS, and JavaScript; ranked Top 25 of 100 teams.
