PROFILE SUMMARY

Aspiring Laravel Developer with a Bachelor of Engineering in Computer Science Engineering and a Diploma in Computer Engineering. Proficient in PHP, Laravel, MySQL, HTML, CSS, JavaScript, jQuery, and AJAX, with hands-on experience in developing dynamic, secure, and user-friendly web applications. Skilled in backend development, integrating frontend interfaces with backend logic, database design and management, and writing clean, efficient, and maintainable code. Passionate about building scalable, high-performance web applications and eager to contribute to modern web development using Laravel and related technologies.

EXPERIENCE

Simform Software LLP (JAN 2026 , Present)

Worked as a Trainee Engineer at Simform, developing dynamic web applications using PHP, MySQL, JavaScript, and AJAX. Built secure CRUD-based modules, integrated frontend and backend components, and worked with Git/GitHub and Linux development environments. Gained practical experience with Laravel and modern web development practices while collaborating in a professional development workflow.

EDUCATION

Gujarat Technological University

B.E in Computer Science and Engineering

CGPA: 8.66

Ahmedabad, Gujarat

Graduated, May 2026

Gujarat Technological University

Diploma in Computer Engineering

CGPA: 8.34

Ahmedabad, Gujarat

Graduated, May 2023

SKILLS & Technologies

Frontend Development: HTML, CSS, JavaScript, React.js, Tailwind CSS, Bootstrap, jQuery, AJAX

Backend Development: PHP, Laravel, RESTful APIs, MVC Architecture

Programming Languages: PHP, JavaScript, C, C++, Java, Python

Databases: MySQL, SQLite, PostgreSQL

Servers & Environment: Apache, Nginx, Linux, XAMPP

Tools & Technologies: Git, GitHub, Vite, Parcel

PROJECTS

AMRV – AI-Powered Medical Report Vault (Laravel 12, PostgreSQL, Flutter, Flask, Azure Blob Storage, Docker, Redis, Nginx)

Developed an AI-powered healthcare platform that securely stores medical reports, generates AI-driven summaries, tracks health metrics, and enables conversational report analysis.

- Built secure REST APIs with Laravel 12, PostgreSQL, and Sanctum authentication for user profiles, medical reports, chat, notifications, and report management
- Integrated Azure Blob Storage for encrypted medical report storage and Flask AI services for report summarization, health metric extraction, and streaming chatbot responses.
- Implemented Dockerized deployment with Nginx, PostgreSQL, and Redis, utilizing queues, background jobs, and scalable architecture for high-performance healthcare workflows.

Society Management System (Laravel12, MySQL, JavaScript, Bootstrap, HTML, CSS, AJAX)

Developed a web-based society management platform to streamline residential operations, visitor management, complaints, and delivery tracking for gated communities.

- Developed a full-stack Society Management System with secure authentication and role-based access for Super Admins, Admins, Residents, and Gatekeepers using Laravel and MySQL.
- Implemented modules for visitor pass management, complaint tracking, delivery management, resident management, and real-time status updates with AJAX and JavaScript.
- Designed a responsive and intuitive user interface using Bootstrap, integrated DataTables for efficient data management, and implemented webcam-based visitor photo capture for enhanced security.

Course Management System (Tech stack: PHP, MySQL, JavaScript, Bootstrap, HTML, CSS, AJAX)

Developed a web-based course management platform to manage courses, students, enrollments, and academic activities efficiently.

- Developed a full-stack Course Management System with secure authentication and role-based access for admins, instructors, and students using PHP and MySQL.
- Implemented CRUD operations for courses, enrollments, assignments, and progress tracking with AJAX and JavaScript for real-time interactivity.
- Designed a responsive and user-friendly interface using Bootstrap with seamless accessibility across devices.

ACADEMIC ACHIEVEMENTS

AU Hackathon 2025: Built FinFlow, an AI-powered financial dashboard with blockchain-based identity verification using React, Vite, Tailwind CSS, and JavaScript, securing a Top 25 position among 100 teams.

PHP Certification – Programming Hub (Google Developer Launchpad): Completed a 30-hour PHP certification covering server-side development, MySQL integration, form handling, and dynamic web application development.
